

## OmniWind

Client	OmniWind, in cooperation with Hanze Wind Energy
Related project	Professorship in Wind Energy
Start date	September 2026
Suitable for training course(s)	International Finance, Finance,
Learning Community	Wind Energy

### Assignment description

OmniWind is looking for a Finance Intern to support the financial management and growth of a fast-moving renewable energy startup. The role focuses on two core areas: maintaining the company's financial structure and supporting project-based financial reporting.

The intern will be responsible for maintaining and updating the company's budget on both a monthly and annual basis. This includes tracking expenses, monitoring cash flow, and ensuring alignment with planned financial targets. In parallel, the intern will support financial reporting across multiple ongoing projects, including tracking hours, allocating costs, and preparing structured reports for internal use and external stakeholders.

As the company is currently executing four long-term projects (spanning over two years), accurate and timely reporting is critical. The intern will play a key role in ensuring compliance with funding requirements and maintaining financial transparency.

Additionally, the intern will assist in preparing financial inputs for grant applications and investor materials. This may include building financial projections, supporting budget justifications, and responding to financial queries from partners or funding bodies.

This role offers hands-on experience at the intersection of finance, innovation, and renewable energy systems.

### Assignment General information

Final Product	Financial budgeting & forecasting, project reporting, and support funding applications.
Location	Entrance and OmniWind
Parties involved	OmniWind, professorship Wind Energy

Details	

## What are we and where can you find us?

Entrance is a learning knowledge community, in which students and teacher researchers from various programmes work together with researchers, companies, governments and civil society organisations to accelerate the energy transition.

EnTranCe is the place where, as a student, you work together with lecturers, researchers, businesses, governments and/or civil society organisations on complex issues. We do this at the following locations:

- Location Proeftuin, Zernikelaan 17
- Location Energy Academy Europe, Nijenborgh 6.

## What do we offer?

Entrance offers you a multidisciplinary, inspiring learning, working and research environment in which you can develop the competencies needed to shape and accelerate the energy transition. There is room for collaboration with professors, researchers, lecturers and the professional field. In addition, you will be supervised by professionals who are part of the EnTranCe Learning Communities (ELC).
